### **DETAILED ACTION**

1. The previous restriction requirement (Paper No.13) is withdrawn in favor of the instant new restriction requirement. Although the inventions or groups remains the same the references provided by the Office for lack of novelty has been changed.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 2 and 15 are drawn to polypeptide and pharmaceutical composition comprising the polypeptide.

Group II, claims 3, 6, 9-14 are drawn to polynucleotide, a vector, a host and a process of producing the polypeptide.

Group III, claims 7 and 8 are drawn to a method of detecting the polynucleotide.

Group IV, claim 16 is drawn to an antibody binding to the polypeptide.

Group V, claims 17 is drawn to an agonist of the polypeptide.

Group VI, claims 18 is drawn to an antagonist of the polypeptide.

Group VII, claim 19 is drawn to a method for treating or preventing a disorder associated with decreased expression or activity of HTMPN.

Group VIII, claim 20 is drawn to a method for treating or preventing a disorder associated with increased expression or activity of HTMPN.

The claims of these groups are directed to different inventions, which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding special technical features because it lacks novelty (Hillier et al., (1998) AA779652; Hillier et al., (1997) AA447814). In particular, each group is directed to different compounds and/or methods. Accordingly, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept and lack of unity is deemed proper.

3. The claims of Groups I and II are drawn to multiple nucleic acid and polypeptide sequences (SEQ ID NO: 1-158). Each of the different nucleic acid and polypeptide sequences are independent and distinct because no common structural or functional properties are shared. Accordingly, these sequences are each subject to restriction under 35 U.S.C. § 121. Regardless of the Group elected, Applicant is additionally required to elect a single nucleic acid or polypeptide sequence (depending on the Group elected), which if determined to be patentable, would also be patentably distinct from the other sequence. This requirement is made under 1192 O.G.68 Notice (November 19, 1996), as examination of more than one sequence in one application would result in an undue burden on the PTO.

Art Unit: 1647

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
